REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: In consideration of the after-final amendment (7/19/2010) which has been entered and in reconsideration of the prior office actions and the responses thereto, the claimed invention is neither expressly disclosed nor fairly suggested by the prior art. The prior art does not disclose or make obvious a topical composition comprising water, approximately 10% to 25% (w/v) glucosamine and at least 10% (w/v) ascorbic acid where the pH ranges from about 3.5 to about 4.1 and the composition is prepared by a process of dissolving about 10% to about 50% of the ascorbic acid at a temperature of between about 60 to about 90 degrees Celsius to provide an aqueous ascorbic acid solution of at least 20% (w/v), cooling to below 40 degrees Celsius and combining the aqueous ascorbic acid solution with water, glucosamine and ascorbic acid to provide said composition and adjusting the pH of said composition to said pH range. The preparation process of the aqueous ascorbic acid solution unexpectedly results in enhanced stability of the ascorbic acid in comparison to conventional low pH formulations containing untreated ascorbic acid (Remarks, page 8 (7/19/2010); Specification, pages 5, 6, paragraph 0010; Declaration (12/03/2009), pages 3-6).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
